New Montessori school opens in central Tokyo

ABC International School is delighted to announce the opening of a new division of ABC.

Opening April 1, 2014, ABC Montessori International will aim to provide the same standards of excellence in early childhood education that have distinguished ABC over the past 15 years. Following the internationally renowned Montessori methodology and curriculum, ABC Montessori International will offer an affordable international school education.

Classes will be held Monday–Friday from 9:15am–2:15pm, with specialized after-school classes in ballet, cooking, sports, and English available daily from 2:30–3:30pm.

The Montessori system is an educational approach developed by Italian physician and educator Dr. Maria Montessori, about 100 years ago.

Montessori classes are mixed-age classes where children of different ages work independently at their own level of progression either at tables or by doing work on floor-mats. Older children help the younger ones by setting examples of how to use the learning materials and equipment and by modelling classroom behaviour.

Children choose an apparatus to work on and move freely in the prepared environment. The apparatus are carefully designed for progressive learning; children learn and master one skill before moving on to the next. Teachers help the children when instruction is needed and children choose freely from five areas; E.P.L. (Experiment in Practical Life), Sensorial, Language (Japanese and English), Mathematics, and Culture (botany, geography, history, and science).

E.P.L. activities assist children in mastering life skills, helping them to gain independence with a

minimum of adult assistance. These activities are often familiar to children — they have observed adults doing them and they try to imitate the adult. The teachers' duties are to watch the children carefully and guide them.

Children absorb content from their environment first unconsciously and then consciously through contact with their surroundings and with the use of

the senses: smell, taste, visual, auditory, and muscular. After children experience the sensorial apparatus, it helps them to develop their mathematical mind.

Mathematics is part of the child's world and it is also much more than numbers. Dr. Maria Montessori developed a special method of teaching children to understand qualities such as size, weight, measurement, height, and comparison, to name a few.

Language is taught using a step-by-step approach. The Montessori strategy uses reading to teach children basic alphabet letter sounds. The method is phonics-based and each piece of apparatus builds on the child's existing knowledge, which can be nurtured according to the need of each individual child.

The culture area is divided into many different categories. These are the fields of biology, botany, geography, history, and science. Dr. Maria Montessori wanted to support each child in all aspects of cultural learning, starting as young as three years. This helps children to develop their personality, to adopt their own culture, to strengthen their sense of independence, and to become a valued member of society.

Parents interested in ABC Montessori International should first attend an open house event or arrange to visit the school, and then attend an interview with the school head before

submitting an application form.

Monthly tuition is ¥150,000. ABC also provides before and after school care to support working parents, from 8–9:15am and from 2:15–5:30pm at a cost of ¥750 for 30 minutes.

We went to the animal fair ...

Gregg International School has spent the last couple of months preparing for their concert at The Persimmon Hall, scheduled to be held just after this issue of *Japan School News* goes to print.

Based around an "animal" theme, the concert will also feature robots, clowns, jugglers, and an amazing strong man. Students from the Ducklings class up to the elementary class will form a cast of singers and dancers, performing on stage in front of parents, friends, and relatives.

The children have been practising over and over again, accompanied by the school pianist and music teacher, with supportive words from the teaching staff. Sets have been painted and outfits have been sewn as the students have thrown themselves into all aspects of the production.

Fun on the farm at RLC

RLC Preschool is looking forward to April and the start of the spring term.

This term's theme is "Farm Life and Growth." Among a huge selection of activities, students will be doing artwork and reading books all about cows, sheep, ducks, horses, chicks, and butterflies — and more. Children will hopefully get the chance to meet some live farm animals on a mini-excursion, too.

RLC is an international preschool that is located in Roppongi Hills, and caters to children from 18 months to four-and-a-half years old. Prospective parents are welcome to visit the school by appointment Monday–Friday between 9 and 10am.

RLC will be welcoming new children to the preschool for the upcoming term, and saying farewell to other children who are moving on to their next kindergarten. Teachers are happy that many RLC "graduates" will be joining the school's special afternoon Extended Programs (EP) from 2–5pm to maintain and continue to develop their English skills. April promises to be a full and exciting month!

Japanese culture day at JIES

Jingumae International Exchange School held its Japanese Culture Day on February 27. This year's theme was "Traditional and Contemporary Japanese Culture."

From the traditional aspect of Japanese culture, students enjoyed *hinamatsuri* (doll festival) by listening to the *kaguyahime* story and decorating dolls through making origami. They also sang a traditional doll festival song — *Ureshii Hinamatsuri*.

They explored contemporary Japanese culture by tasting *dorayaki*, which is Doraemon's favourite snack; playing a board game about the Yamanote Line; decorating the school with their favourite Japanese animation; and singing Doraemon's song, *Yume o kanaete*. The preschool and kindergarten students danced the *Marumaru morimori*.

Later in the afternoon the Japanese Dance ASP students and teacher performed the *Nihon Buyo* (Japanese dance), the former also performed some hip-hop dancing, and a special guest played the flute. — KAYOKO KOBAYASHI

Cezars Café highlights fresh-baked goods for students

Cezars Café, supported by Cezars Kitchen, provided delectable fresh-baked goods and premium-roasted coffee throughout the all-day "Choose Japan" college recruiting fair held at Aoba-Japan International School (A-JIS) in February.

A-JIS hosted the Choose Japan Education Fair in February, attended by Kanto-based students from grades 10-12.

The fair focused on Japanese universities and colleges that offer English-based or bilingual degree and diploma study options, and provided students with the opportunity to learn about post-secondary

education choices within Japan.

The day included presentations from students attending Japanese institutions, advice on admissions and examination preparation, information on vocational training opportunities, how to apply to Japanese universities, and information on available scholarships. The day ended with a prize draw and opportunities to network and socialize with students, parents, and educational representatives.
